C. EARLY BIRD ALERT—Early Bird Alerts work in conjunction with Ultimate Market Timing (UMT) and Tribal Trading Tactics (TTT). The trading ideas in Ultimate Market Timing are generally longer term or strategic trading ideas; while the trading ideas in Tribal Trading Tactics are generally short-to intermediate or tactical trades.

We broadcast Early Bird Alerts via e-mail to fine tune the trading process. These alerts serve several functions. Sometimes, we will alert you of an actionable trade before we have time to produce and send the corresponding chart analysis. In those cases, we send the analysis via Adobe PDF ASAP.

In some cases, an actionable trade idea is in place, but we want to see how price trades for a day or so before entering and we use Early Bird Alerts to communicate when we initiate buying or selling. In other cases, we use early bird alerts to close out positions early, to adjust stops or to take profits.

All early bird alerts are sent via e-mail, but they are also archived.

D. The Pro Trader Package—Get All Three: *Chart News Daily, Ultimate Market Timing*, and all *Early Bird Alerts* at \$65 per month. **[Order Now](#)**.
